CV type 4 linked carburettor to cover wide range of response in low to high revolution.

30000-MSI-000, SPECIAL DISTRIBUTOR DRIVE KIT  
( Only available as complete unit )

(a) CV-4 carb can not be installed, due to contact for position of original distributor.  
(b) Incorrect installation. No increase of power is expected.  
(c) Increase 15% of out put.

Special distributor drive kit to shift the position of distributor 90 degree which enabling to install CV type 4 linked carburettor. (Required to install this kit together with CV-4 linked carburettor.)
